AUG 10

Intro to Claude

Claude Desktop (Chat, Cowork, Code) and the Claude plugin for Excel — the everyday surfaces you will use throughout the workshop.

AUG 11

Claude Tools

Code execution, the command line, web search and fetch, and browser use — letting Claude act, not just answer.

AUG 12

Skills, Connectors, and Plugins

Customizing Claude and adding capabilities for your own teaching and research workflows.

AUG 13

AI for Teaching

NotebookLM, retrieval-augmented chatbots, and slide voice-overs for course materials.

AUG 14

Student Projects

Artifacts, apps, and agents — what students can build, and how to assign it.

AUG 17

Research Setup

Academic Studio, Python, R, LaTeX, Quarto, Git, and GitHub — a reproducible environment for AI-assisted research.

AUG 18

AI for Research

Literature search, knowledge databases, writing, and reviews.

AUG 19

Agent Assistants

Building a research team of agents and personal assistants that carry work across sessions.

Joining the sessions

TIME 3:00 – 4:00 PM, each session day
