

7. TEACHING TOOLS AND FEEDBACK

Rice Business 2026

Kerry Back
Rice Business

Odds and Ends

- AI Lab (exec ed, mba launch)
- Survey and screenshare
- Participation recorder
- Narrated slide decks

- Quarto slides
- Presentation feedback
- Run models locally

Presentation Feedback

Yoodli	Pace, filler words, pitch and interview role-play
--------	---

Orai	Mobile, gamified, cheapest of the four
------	--

VirtualSpeech	A simulated room and audience
---------------	-------------------------------

Speaker Coach	Already inside PowerPoint and Teams
---------------	-------------------------------------

All four coach delivery and know nothing about your subject. Cheap, off the shelf, and orthogonal to anything we grade.

Running Models Locally

TO RUN	YOU NEED
Frontier models	Millions of dollars of GPUs
A 20–30B model, quantized	A workstation, a high-end Mac, NVIDIA Spark
A 2–8B model	Any laptop

Hugging Face hosts millions of open-weight models at huggingface.co.
Ollama is the thing that downloads one and runs it.

Examples

- 1
- Install Ollama from ollama.com
- 2
- `ollama run gemma4:e4b`

<code>gemma4:e2b</code>	7.2 GB	2.3B effective
<code>gemma4:e4b</code>	9.6 GB	4.5B effective
<code>gemma4:12b</code>	7.6 GB	Dense
<code>gemma4:26b</code>	18 GB	MoE, 3.8B active
<code>gemma4:31b</code>	20 GB	Dense

Path Forward

- AI Working Group
- Anything else?
